

New Hampshire Preservation Alliance 2010 Annual Preservation Achievement Awards

Criteria

Each year the Preservation Alliance seeks to recognize outstanding preservation work in New Hampshire. The Preservation Achievement Award Committee considers the quality of work, the project's innovation, the degree of challenge or accomplishment, and the level of community support for the project. Construction projects also consider the importance of the historical resource and are evaluated against the Secretary of Interior's Standards for Rehabilitation. Please contact the New Hampshire Preservation Alliance office if you need a copy of these standards. Projects must be located in New Hampshire.

Restoration/Stewardship [please use Form A]:

Recognizes exemplary work that returns a building or landscape to an earlier condition and appearance. Stewardship awards are presented to those who are ensuring the protection of historic properties through stabilization or long-term care and maintenance.

Rehabilitation/Adaptive Use [please use Form A]:

Recognizes exemplary work in preserving significant portions and features of an historic resource while preparing it for a new or contemporary use.

Compatible New Construction/Additions [please use Form A]:

Recognizes outstanding examples of compatible new construction or exemplary additions to existing historic buildings and landscapes.

Education and Planning [please use Form B]:

Recognizes initiatives such as master plans, school or youth projects, publications, exhibits or special programs that have substantially heightened public awareness or protection of the state's heritage.

Advocacy and Public Policy [please use Form B]:

Recognizes an individual or group that has made an outstanding recent contribution or caused a beneficial long-term impact upon the preservation movement in New Hampshire through leadership, education, technical services, public policy, or advocacy.

The Preservation Alliance advises that all projects which involve construction/rehabilitation work must adhere to applicable local, state and federal requirements including, but not limited to, building and safety codes, ADA and state accessibility requirements. Projects receiving federal or state funding or permits need to comply with Section 106 of the National Historic Preservation Act and/or RSA 227-C:9, as applicable.

The New Hampshire Preservation Alliance is the statewide membership organization committed to preserving historic buildings, communities and landscapes through leadership, education and advocacy.
